NB Knob-turn shown is not the same as the one supplied by Q-Locks. Please see page 14 as well as the photograph on the right for more details, or speak to a member of our staff.

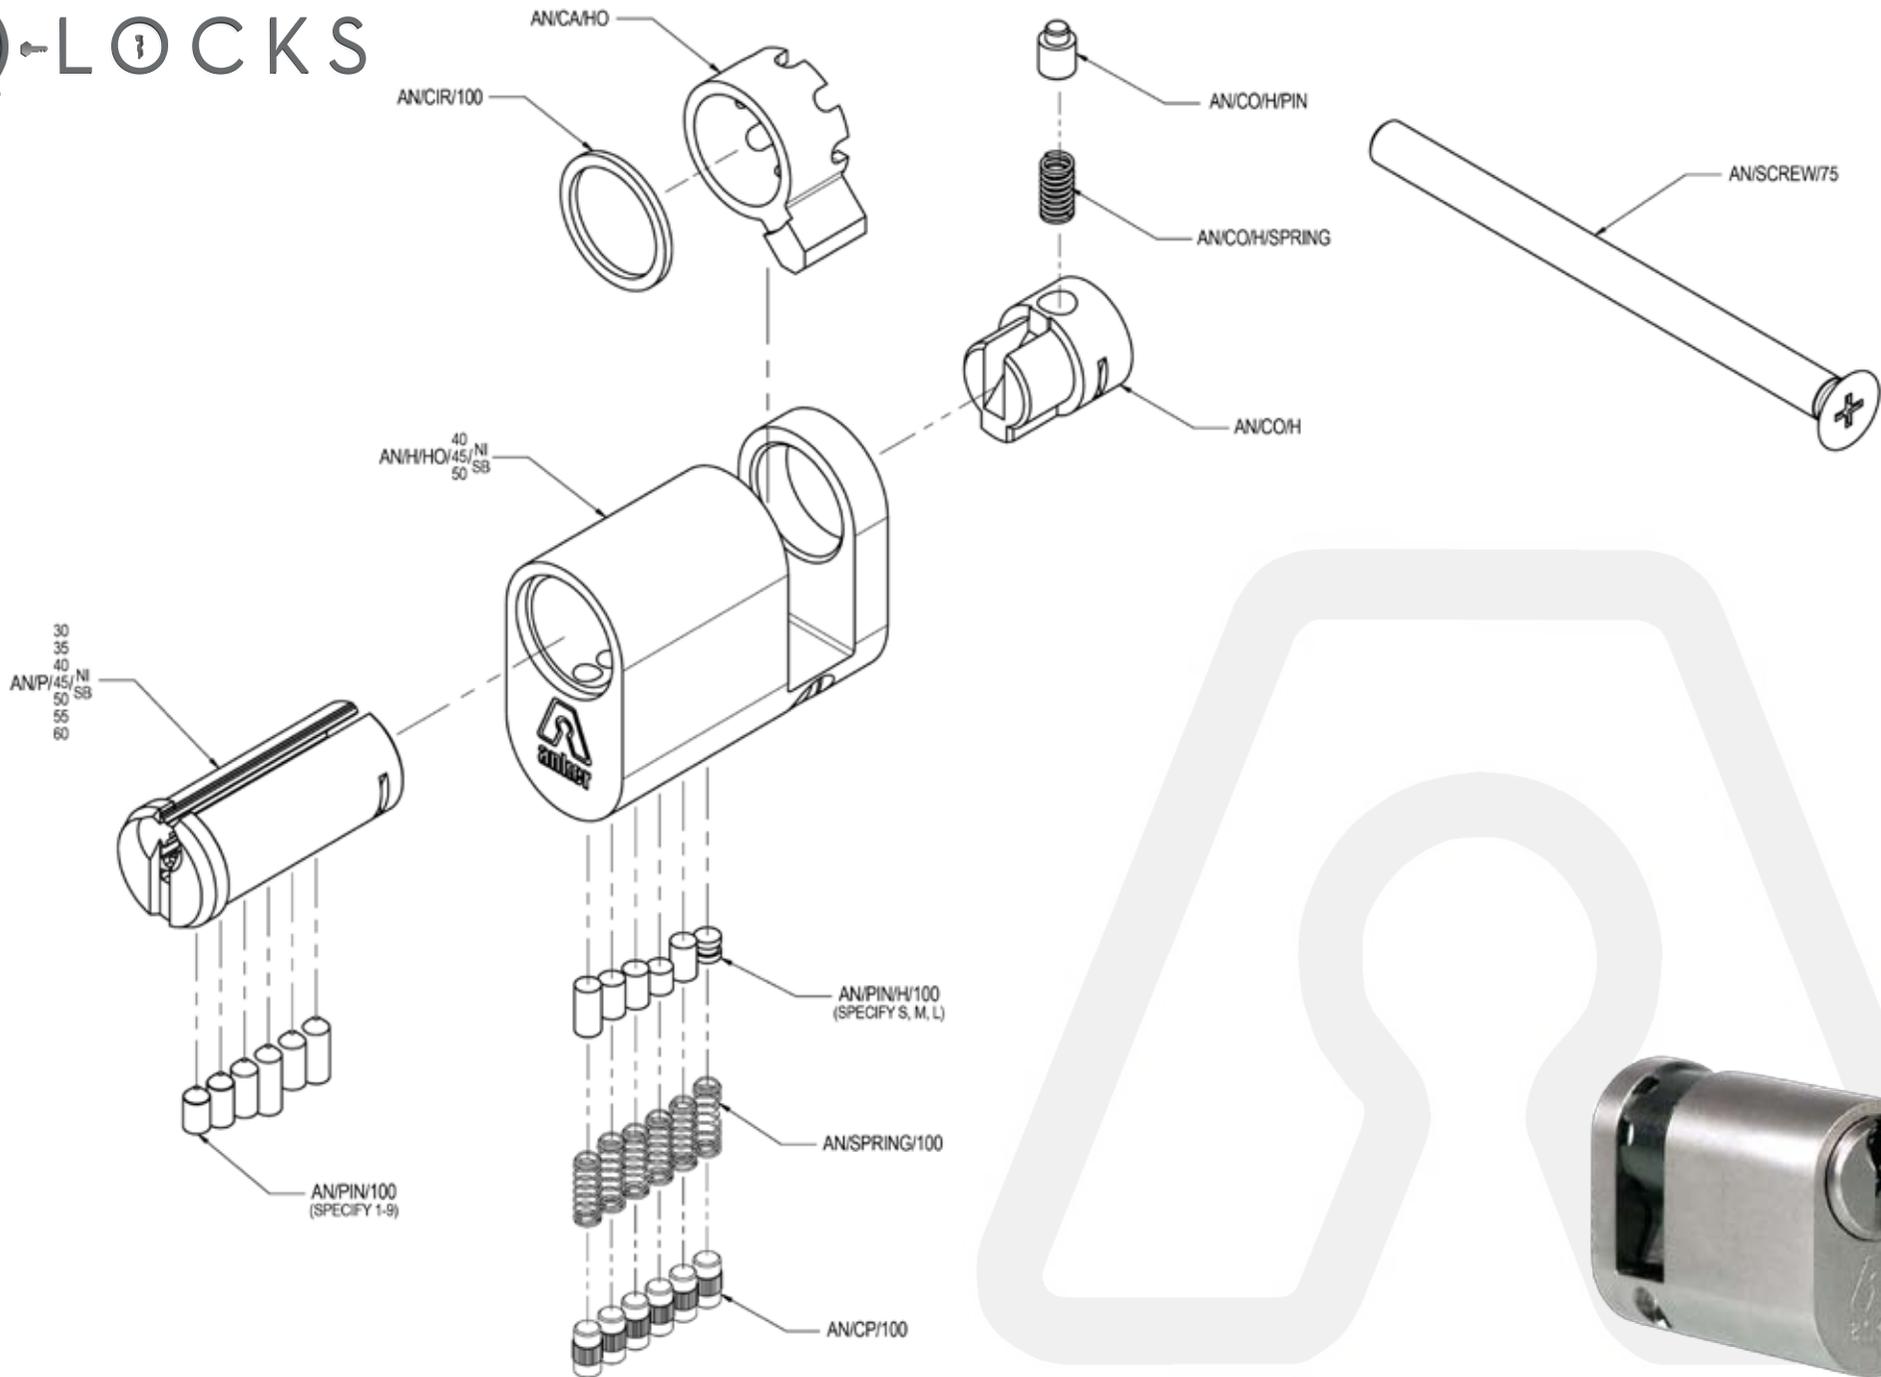

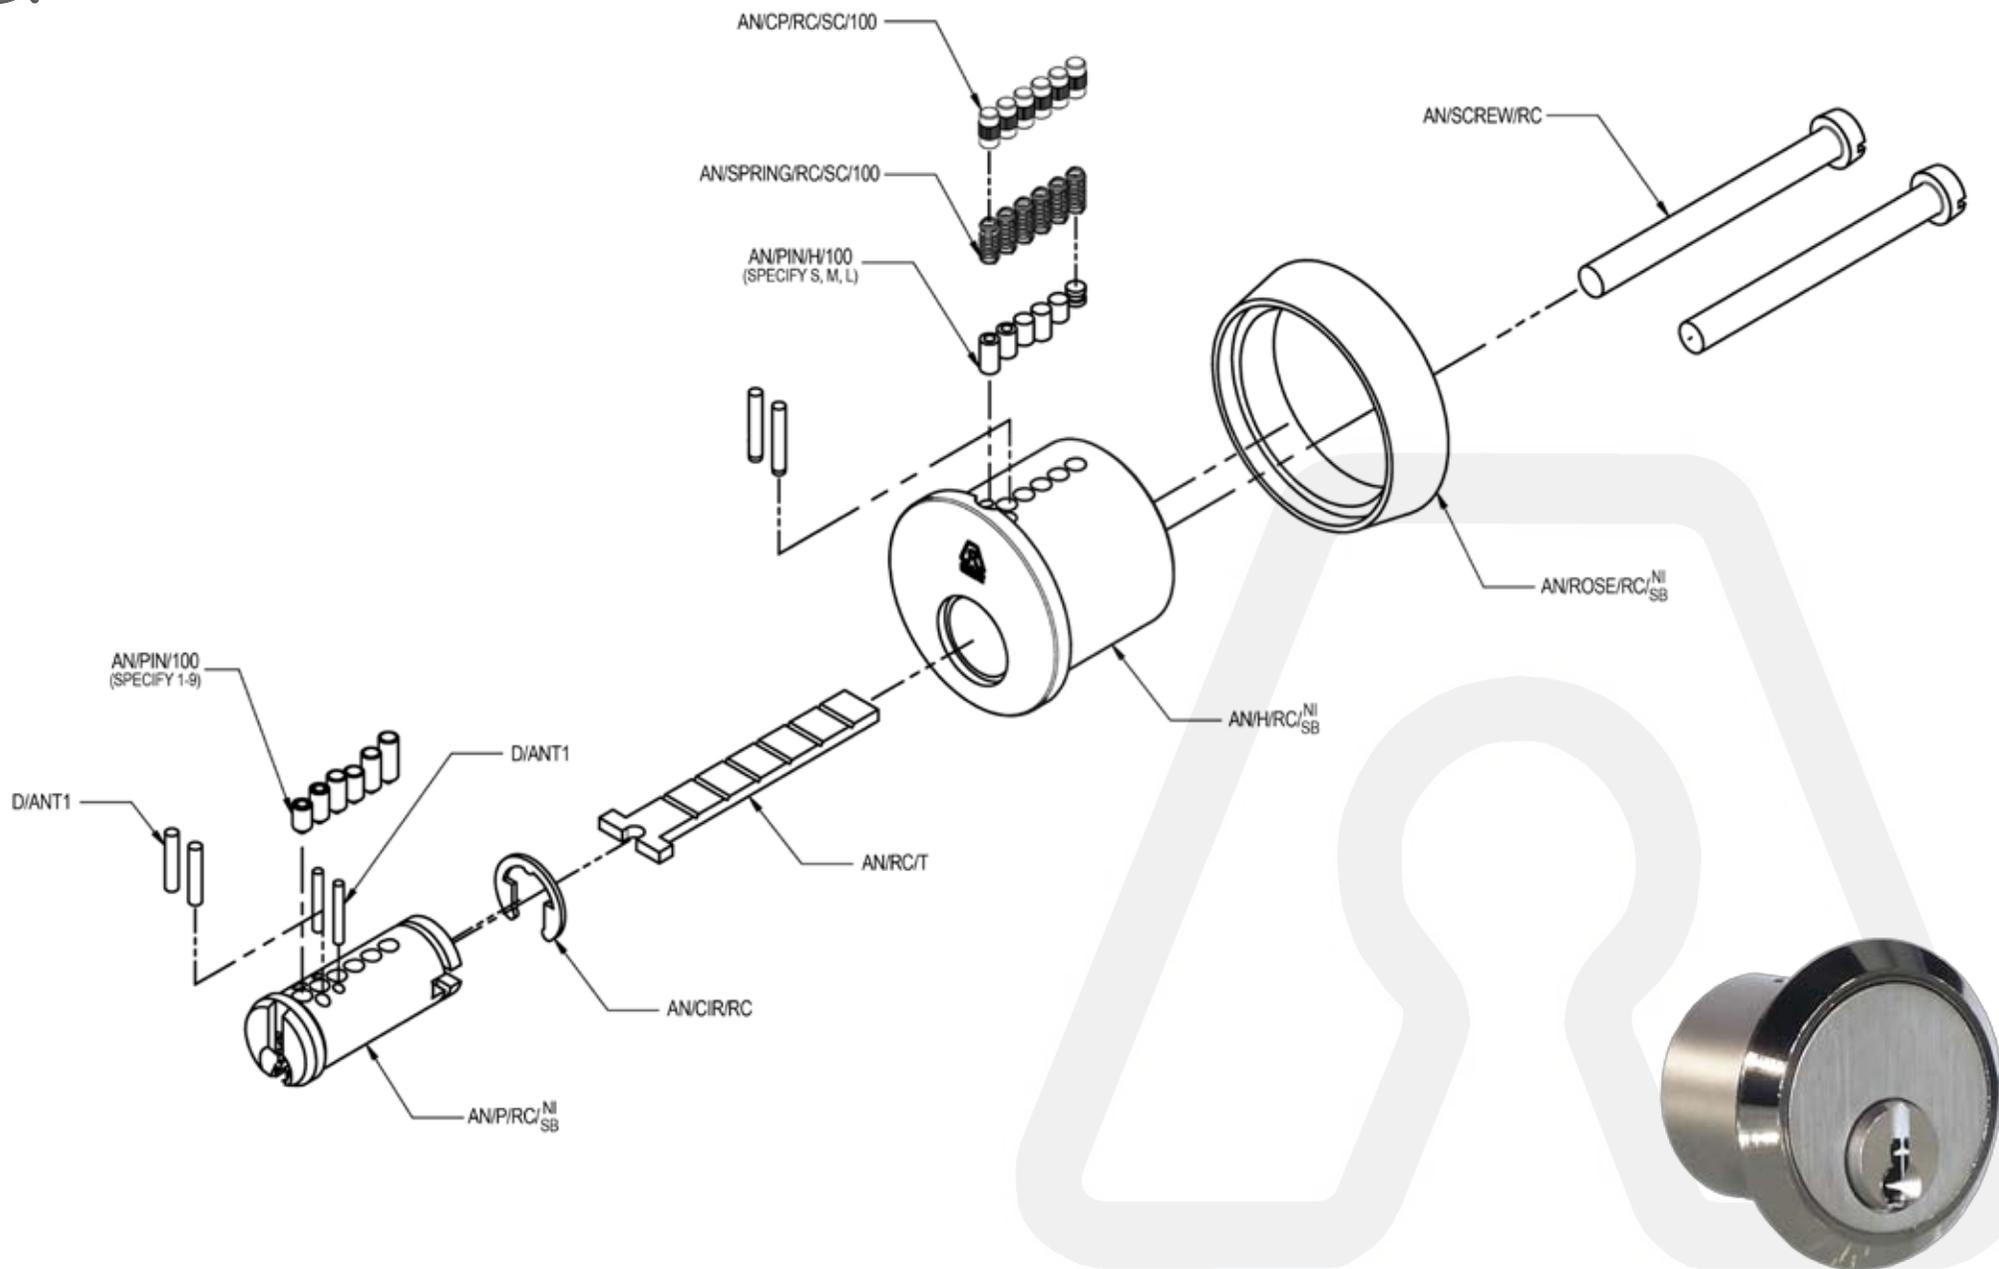

Q-LOCKS

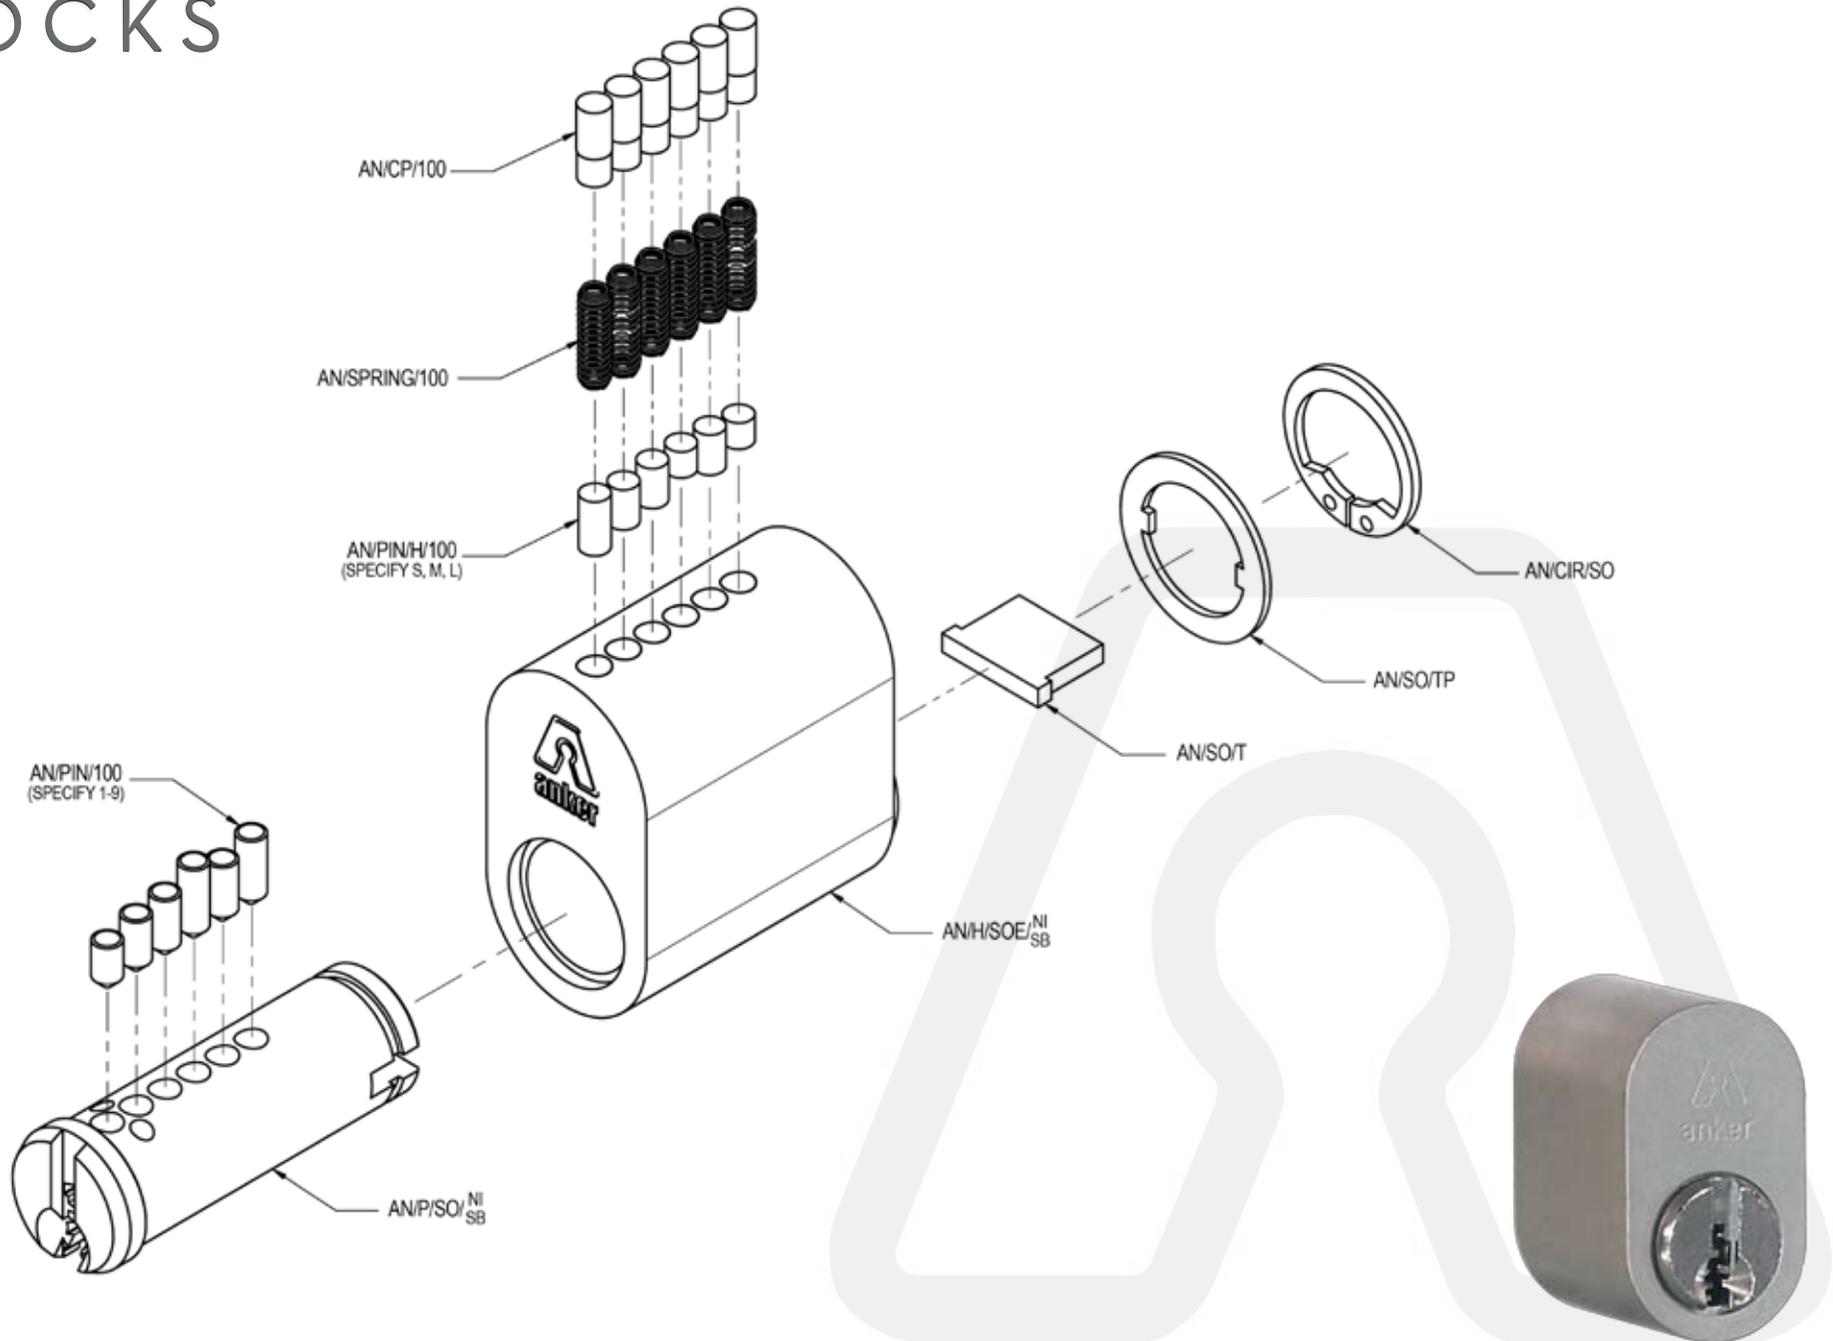

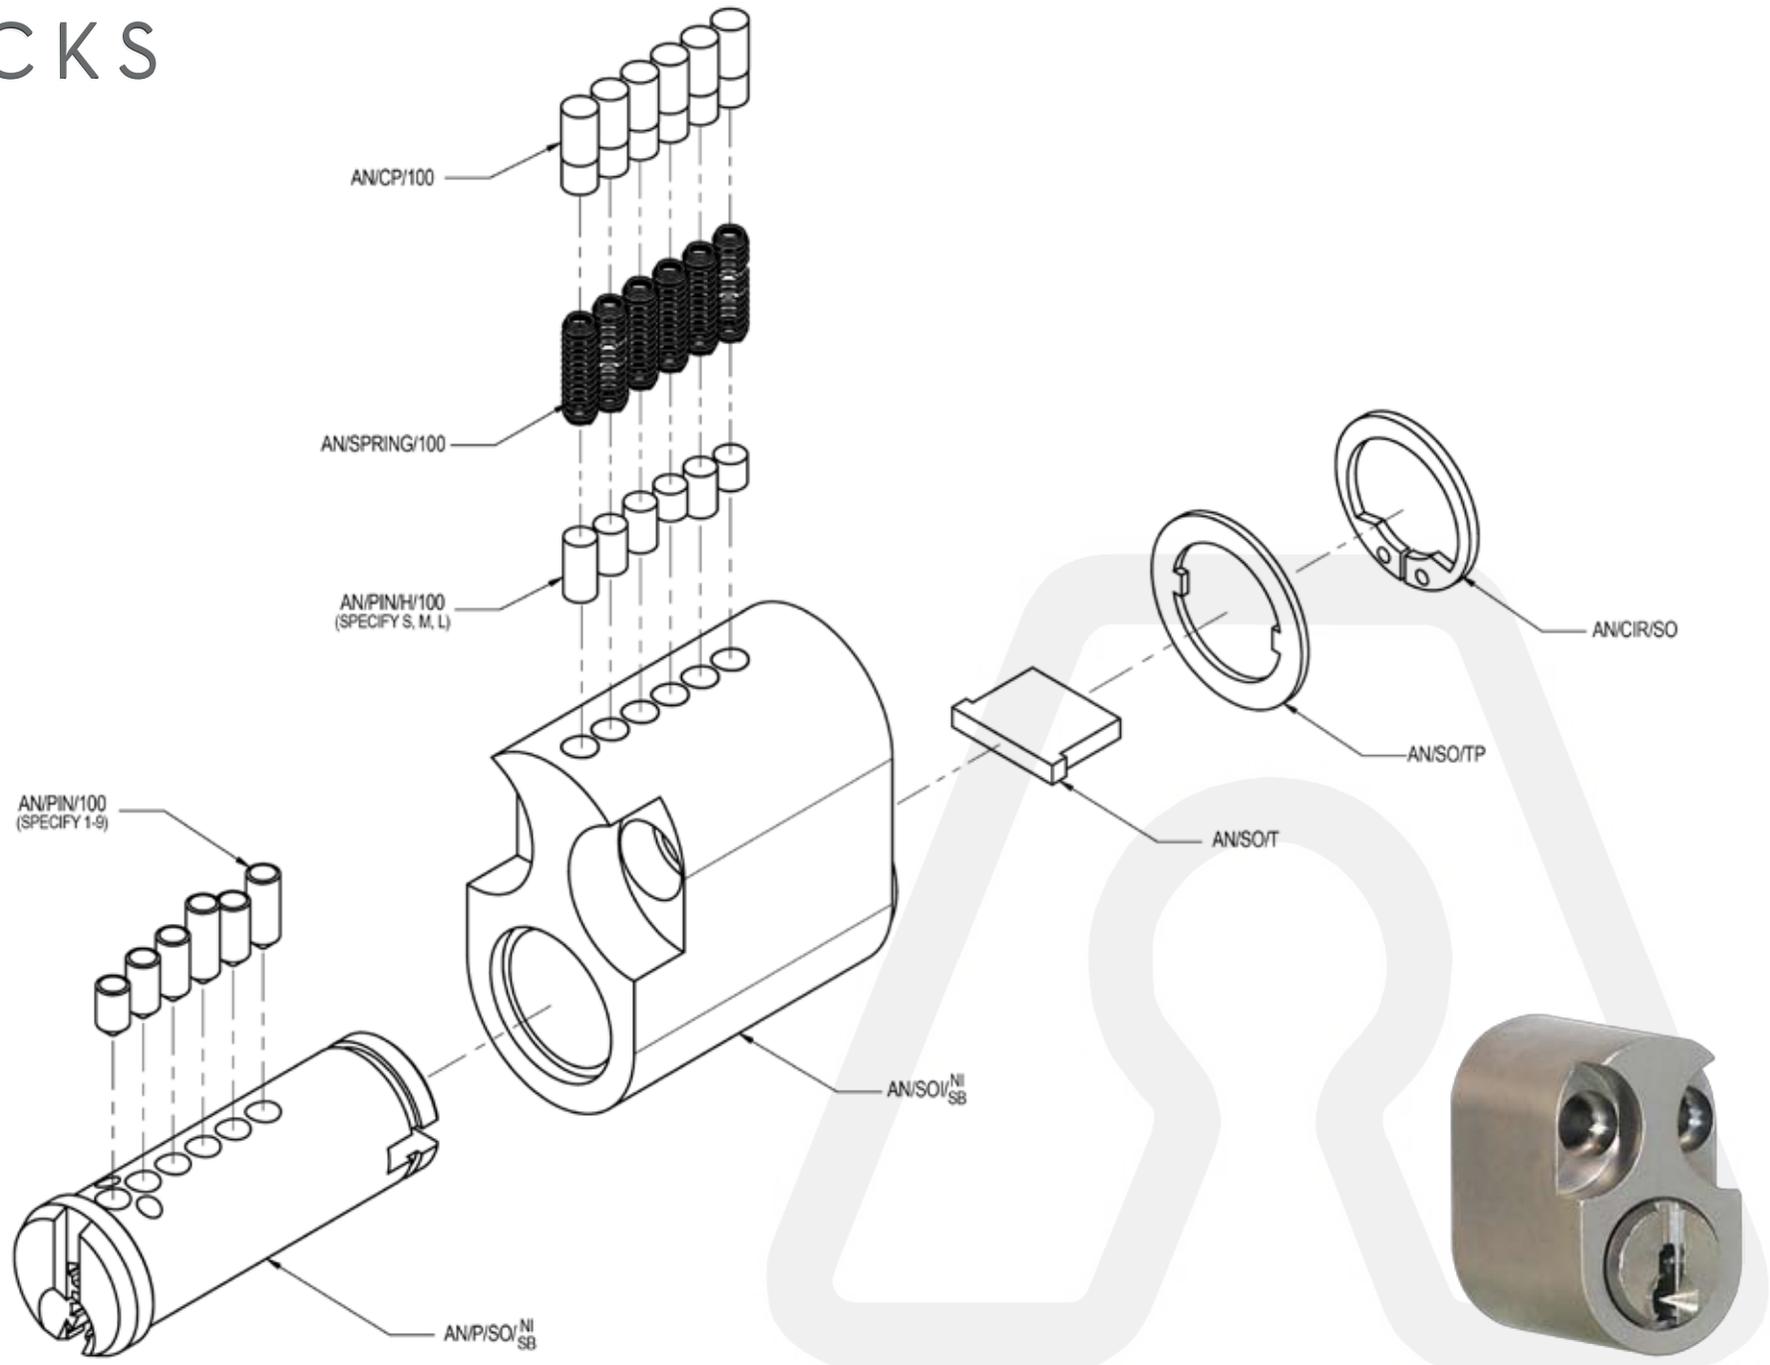

NB Knob-turn shown is not the same as the one supplied by Q-Locks. Please see page 14 as well as the photograph on the right for more details, or speak to a member of our staff.

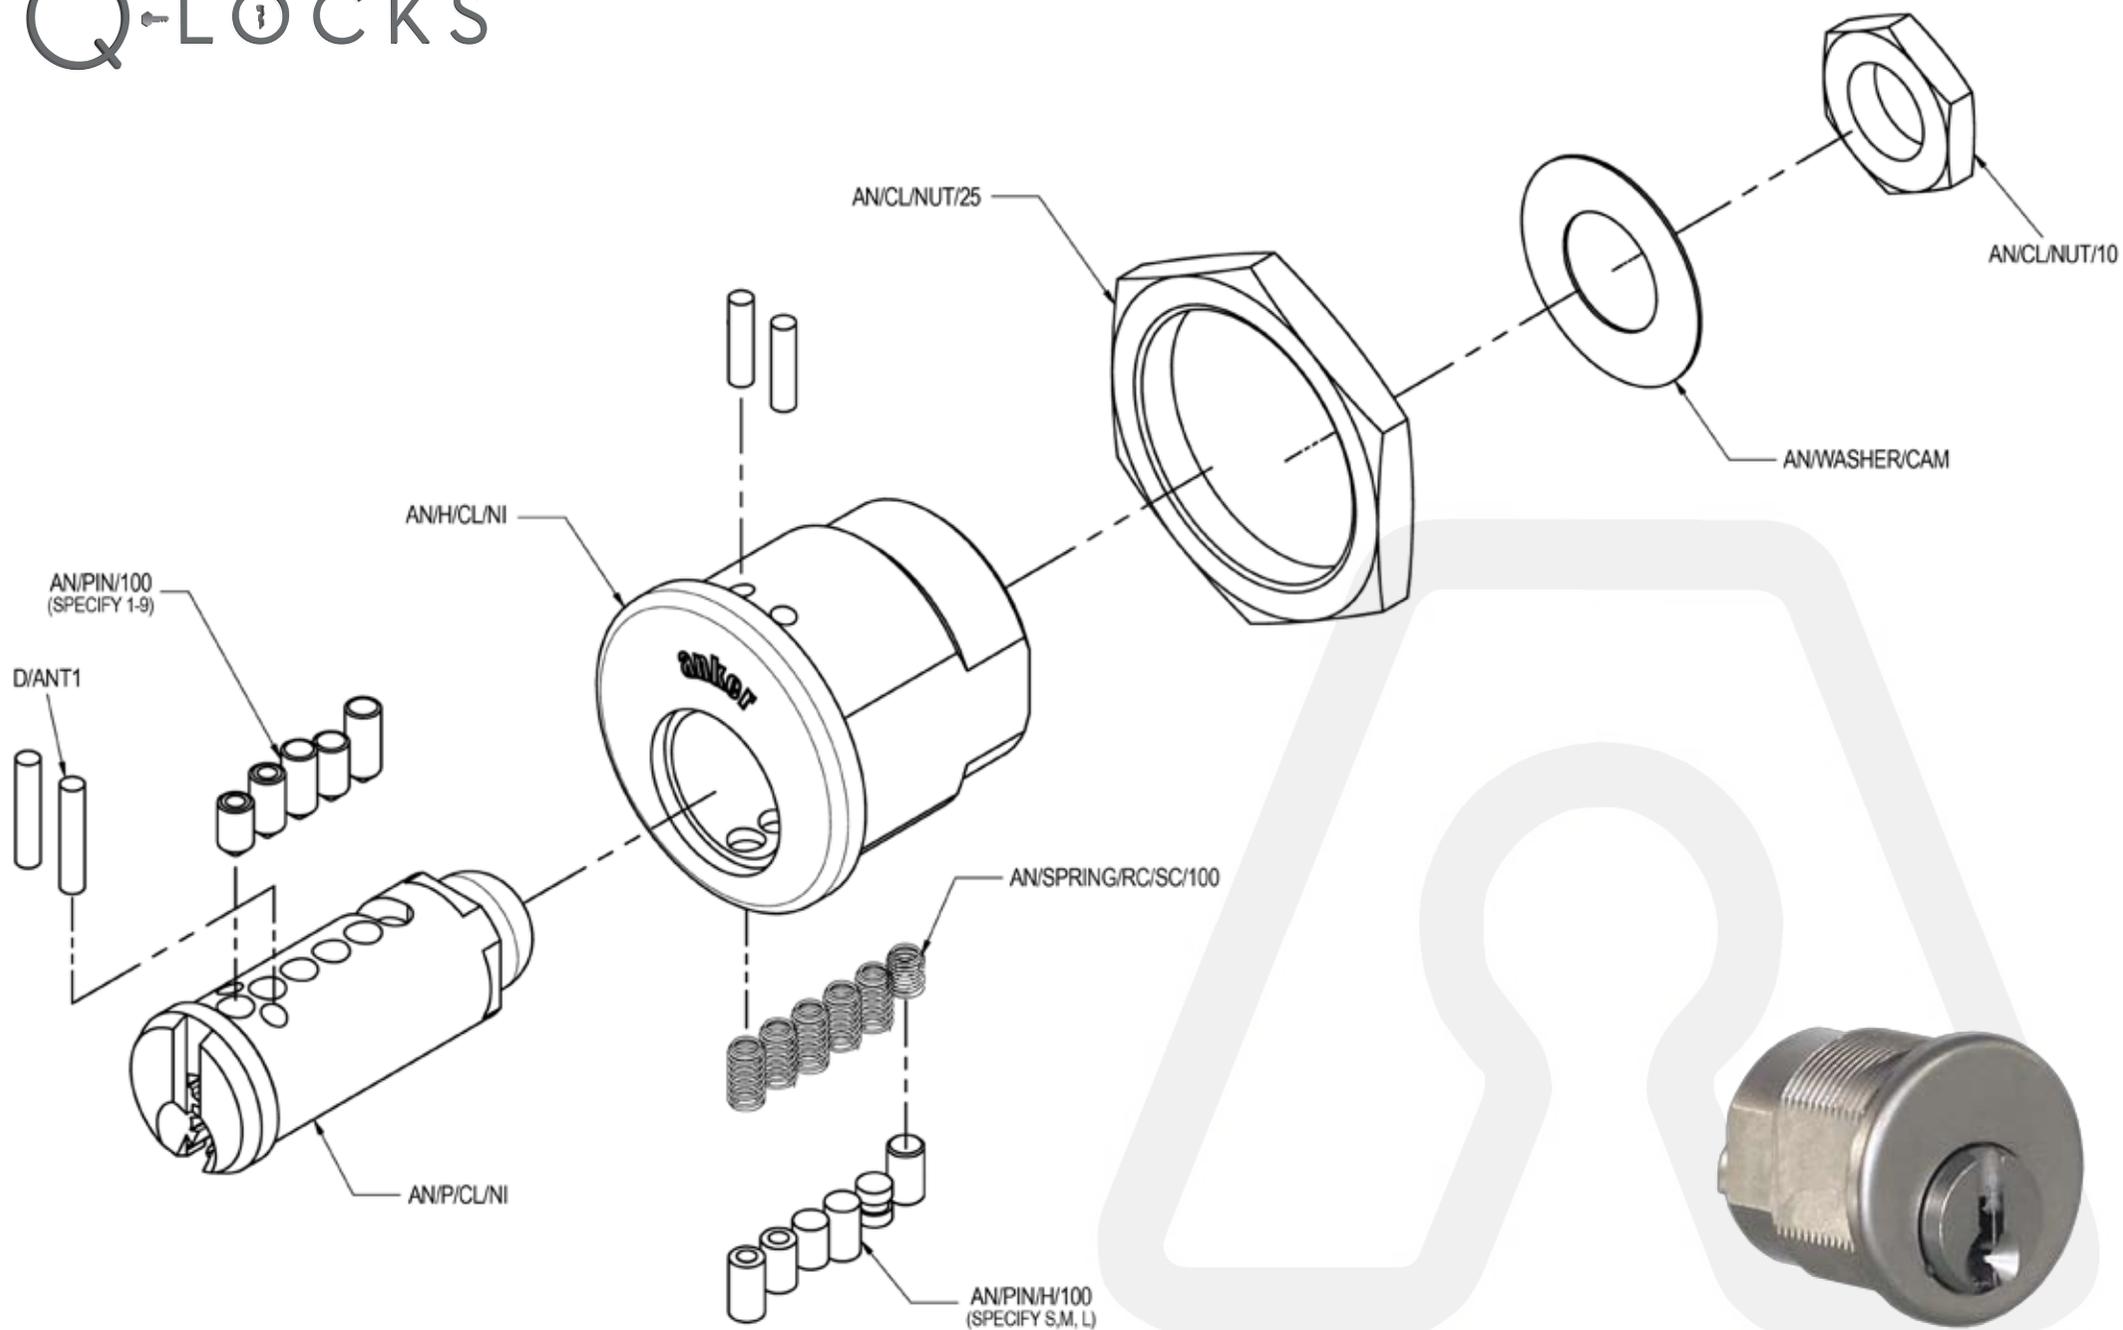

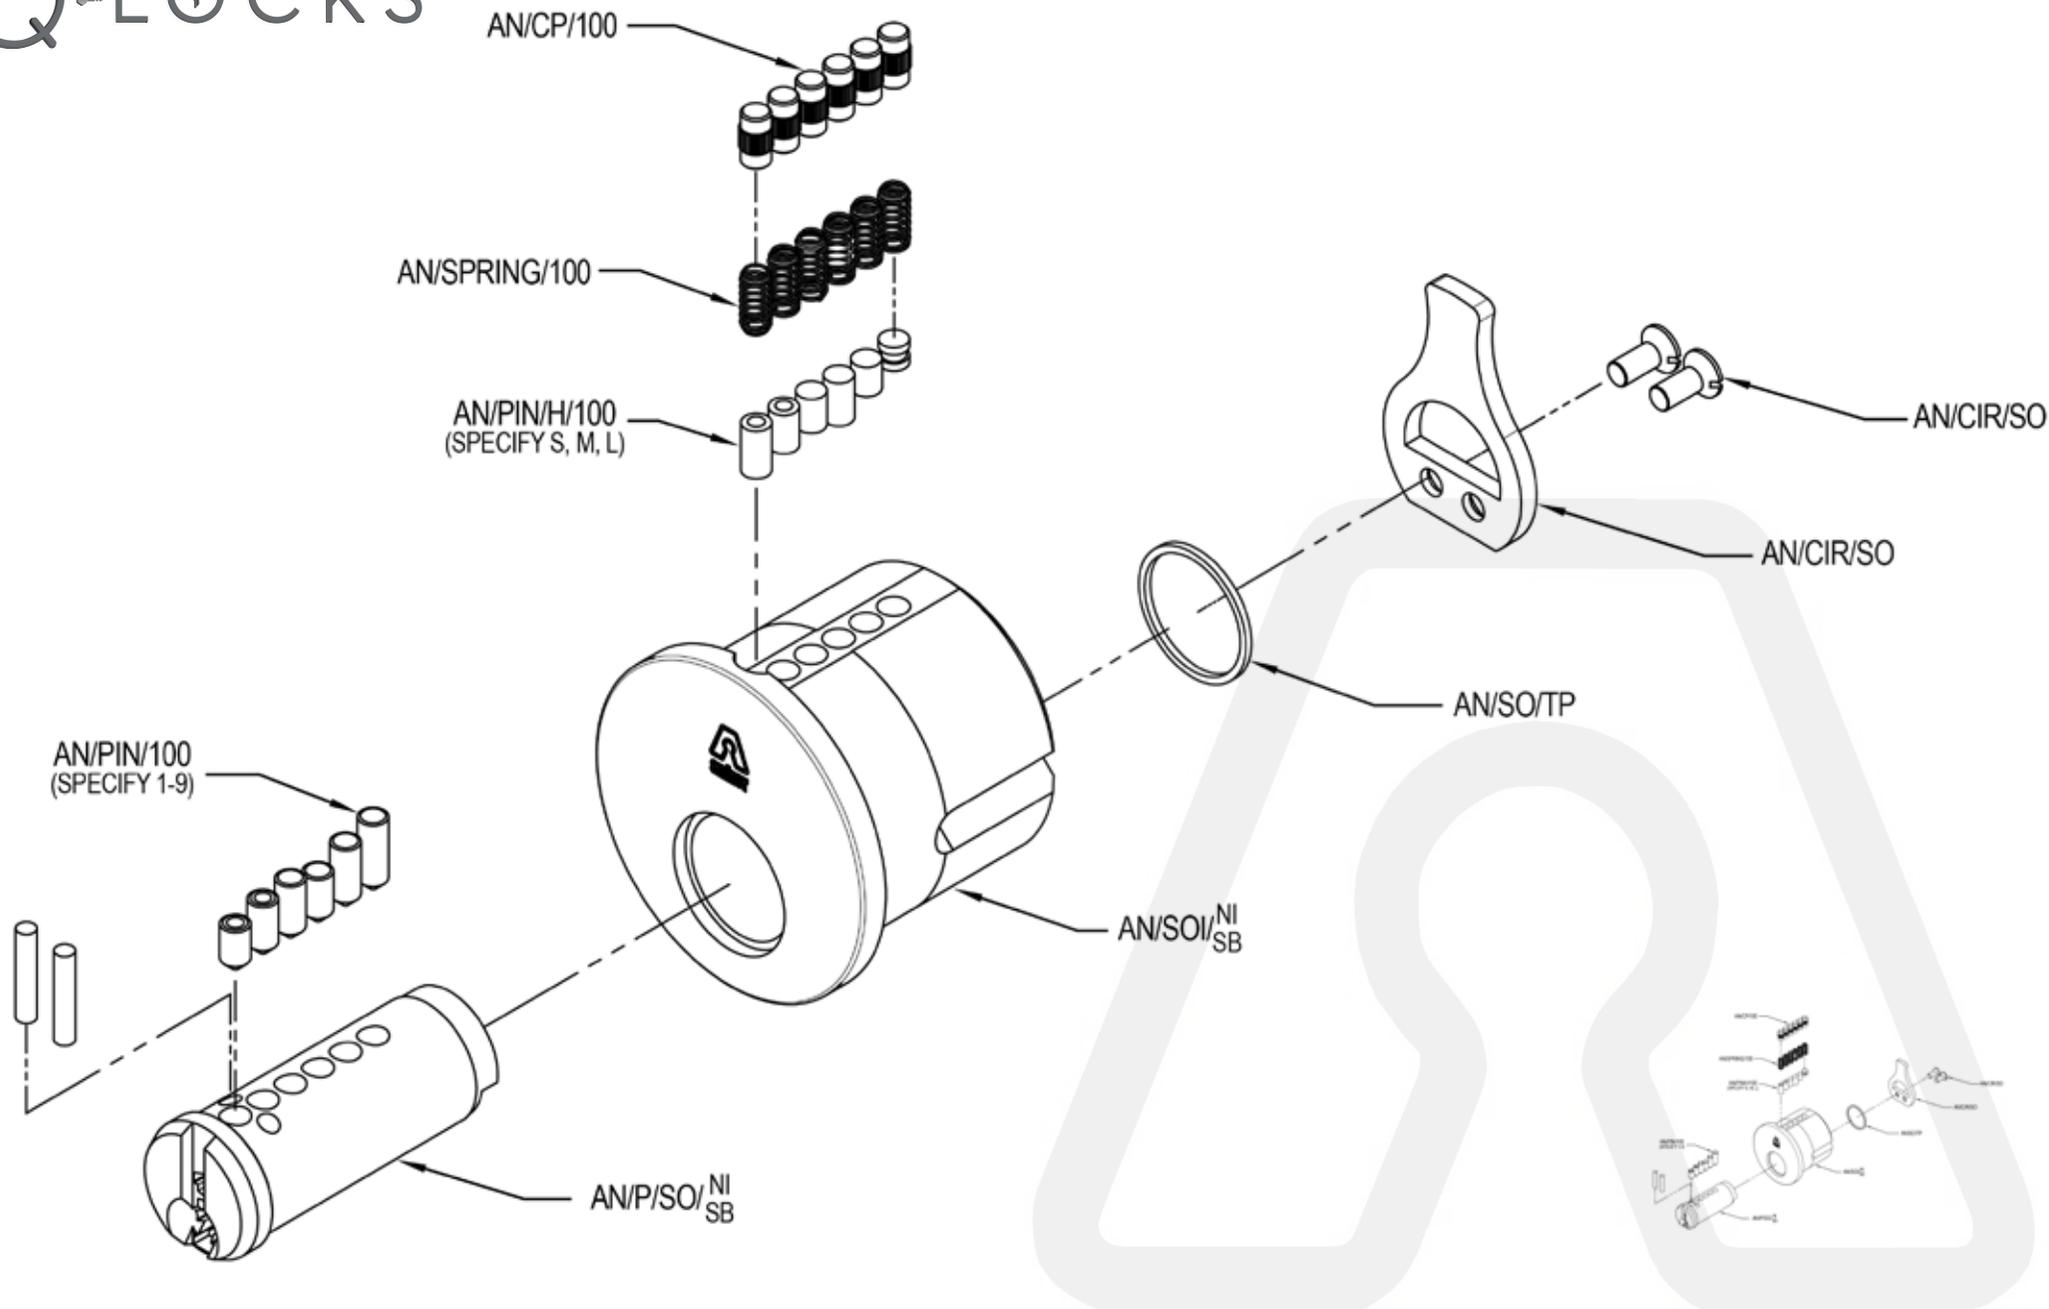

Explanations & Extra Information

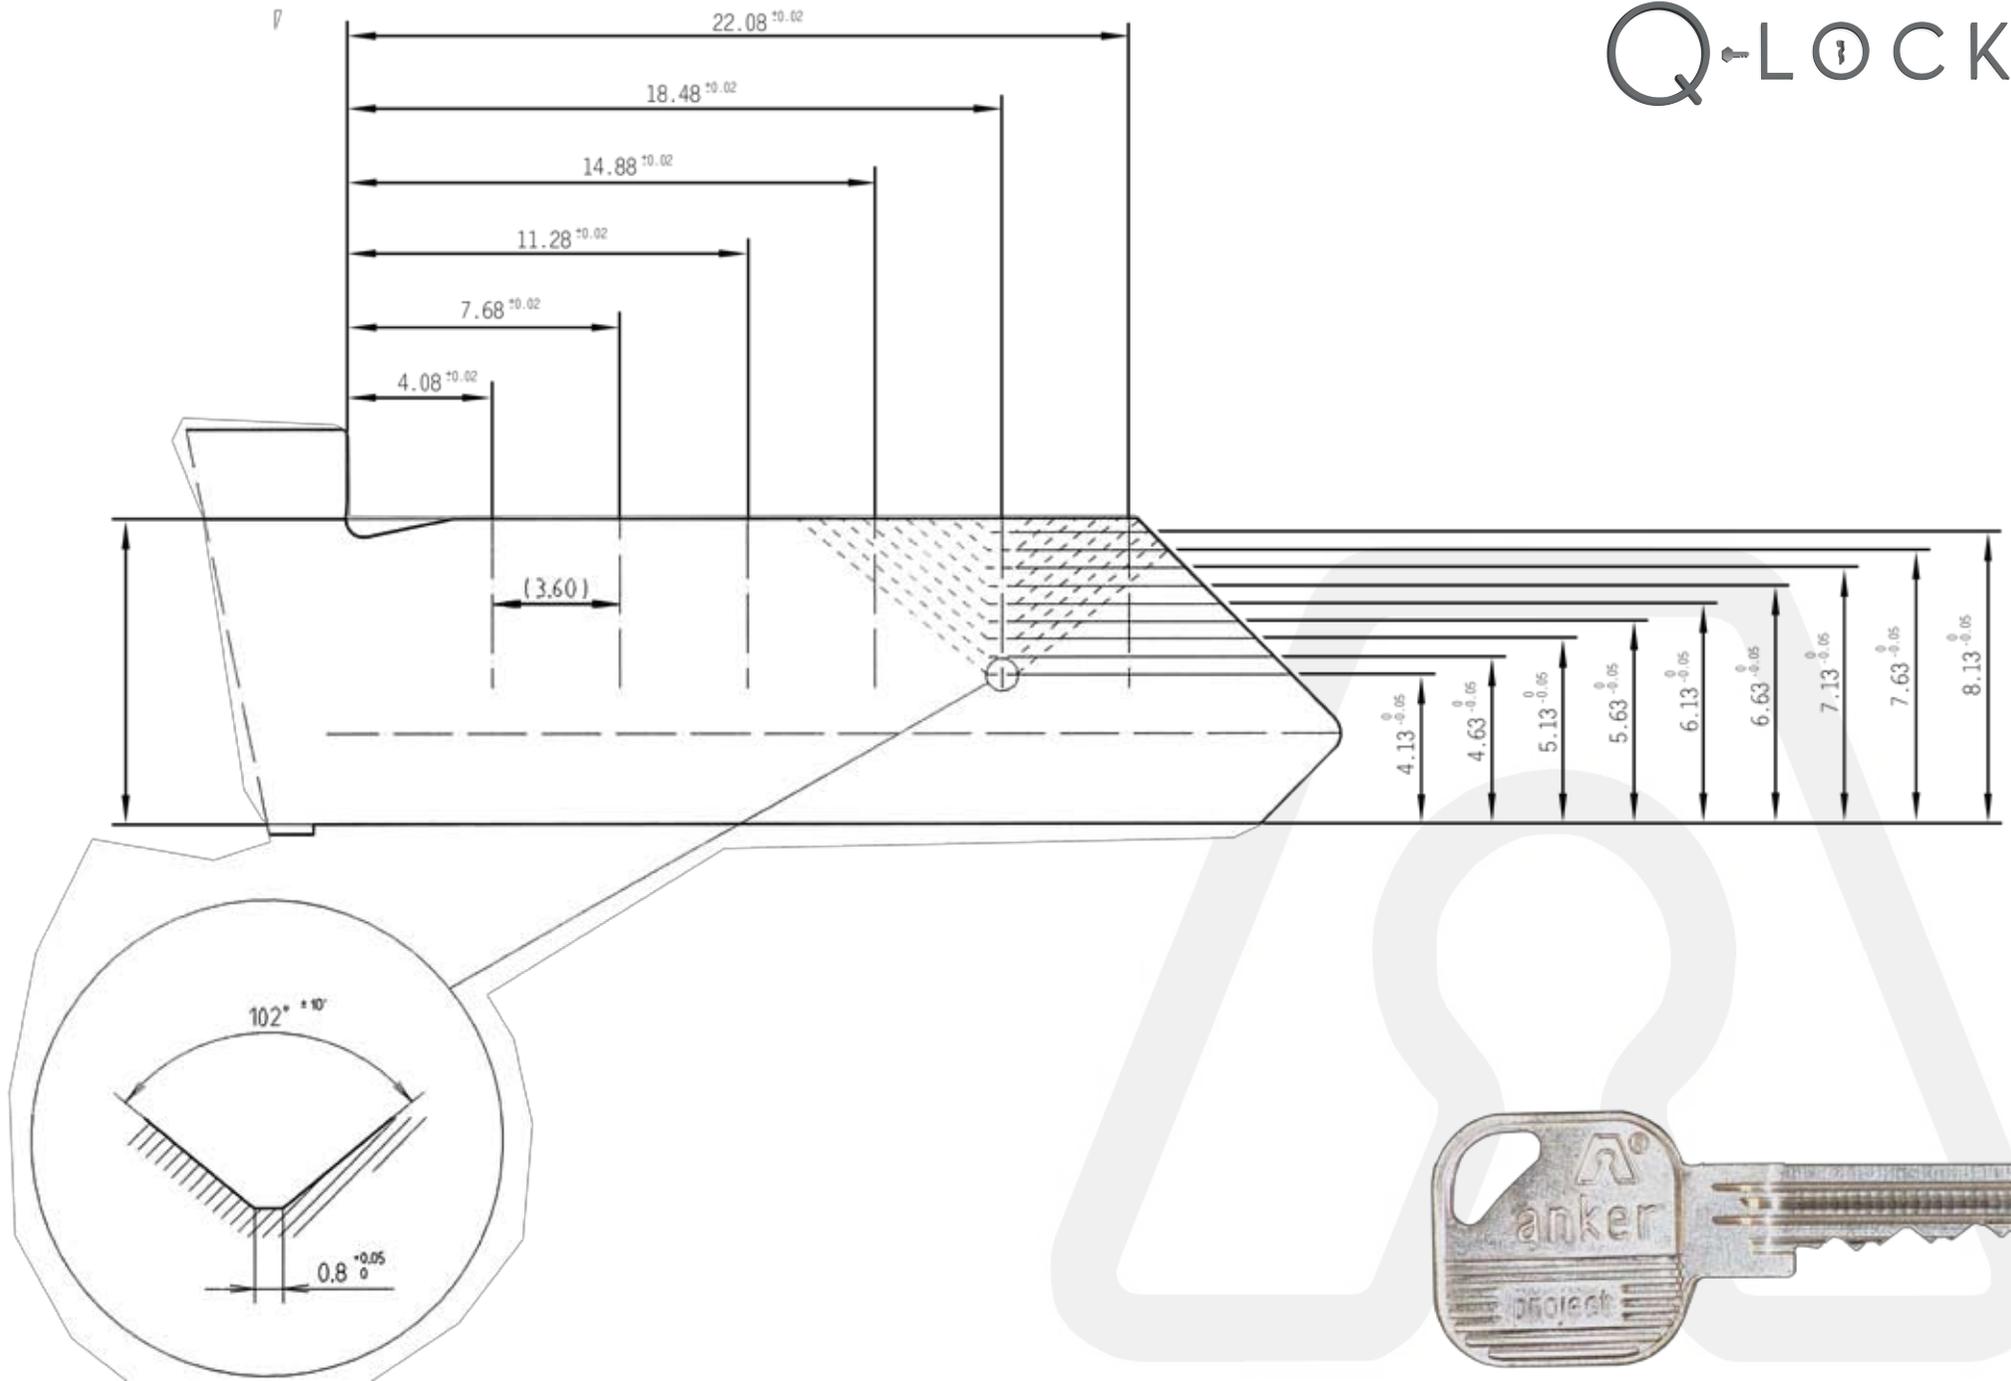

The knob-turns shown in the drawings are not the same as the ones supplied by Q-Locks. Examples of the standard and alternative knob-turns that are supplied with Anker cylinders are shown in the photographs below.

The circlips shown in the drawings are also not the same as the ones supplied by Q-Locks, and a photograph of the actual circlips is provided, below.

In the product codes in this booklet, codes are sometimes shown with a column of numbers. These are alternative measurements that are available.

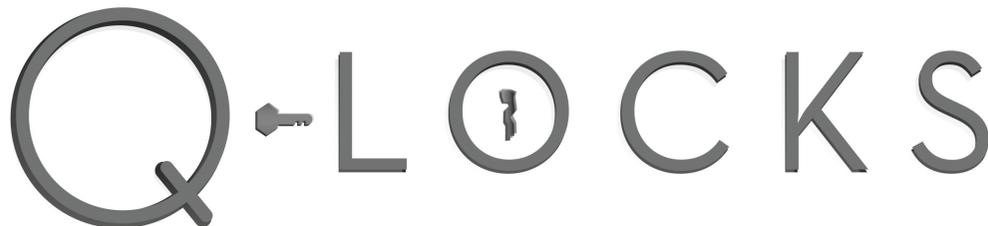

Occasionally in the product codes you will find "mm", which should be replaced with the measurement that is needed.

notes

Anker cylinders, components and support are provided in the U.K. by Q-Locks Ltd:

Q-LOCKS LTD

Unit 3, Gateway Mews, London, N11 2UT

Phone: +44 (0)20 8368 5933 Email: sales@q-locks.co.uk
